Education

Meram Anatolian High School

September 2018 – June 2022

- GPA: 96.69 / 100

Ankara University – Computer Engineering

September 2023 – Present

- Relevant Coursework: Software Development, Data Structures, Machine Learning, Web Development
- Projects: aysecerensenal.com
- GPA: 2.91 / 4.00

Resume

As a Computer Engineering student at Ankara University, I have a strong foundation in software development using Python, Java, C, and SQL. I have conducted both theoretical and practical studies in data structures, algorithms, machine learning, web development, and software architecture.

In the projects I develop, I focus on modularity, performance, and clean code principles, actively utilizing my problem-solving, analytical thinking, and system design skills. I prioritize building sustainable solutions by applying version control systems, test-driven development, and modern software practices.

I actively take part in two different projects within Teknofest. As the team captain in the Artificial Intelligence in Aviation competition, I manage team coordination, project development, and technical decision-making processes. Additionally, I participate in the Mining Technologies competition, where I work on real-time data analysis and AI-based systems.

As a Social Media Ambassador in the HSD community, I manage all digital communication processes, including content creation, brand voice development, and strategies to increase community engagement. Previously, I held roles as Secretary and Organization/Prime Team Lead, gaining experience in team coordination and leadership.

My career goal is to specialize in artificial intelligence, cloud computing, and software development, and to actively contribute to innovative projects while developing high-impact systems.

Technical Skills

- Programming Languages: Python, Java, SQL, C
- Web Development: HTML, CSS, JavaScript, Responsive Design, RESTful API integration, Flask, JSON
- Machine Learning & AI: Scikit-learn, Pandas, NumPy, Model Training and Evaluation
- Databases: SQL, Database Design, Data Modeling, Query Optimization
- Tools & Technologies: Git, GitHub, ReportLab, Joblib
- Software Development Practices: Clean Code, Modular Programming, Version Control
- Cloud & Systems: Cloud Computing Fundamentals (AWS – currently learning)

Personal Skills

- Taking Responsibility, Process Tracking, Communication and Documentation
- Problem Solving and Analytical Thinking
- Project Management and Teamwork

Experience & Volunteer Projects

Uçak Software – Software Development Intern

January 2026 – February 2026

- Designed and developed a two-version, machine learning–based decision support system working on finance and HR datasets.
- Built a Flask-based web application integrating Excel data upload, automated feature extraction, model selection, and PDF report generation.
- Applied Linear Regression and Logistic Regression algorithms, achieving 91% accuracy in classification tasks.
- Enhanced system flexibility by developing dynamic column detection and automatic model selection compatible with different data schemas.
- Integrated LLM-based AI (Ollama3) for automated textual interpretation of model outputs and structured report generation according to user instructions.
- Created a data preprocessing pipeline covering missing data (NaN) handling, standardization, validation, and error checking to improve system stability.
- Used Joblib for model persistence and ReportLab for automated report generation. Designed a modular backend architecture to increase maintainability, reusability, and scalability.
- Technologies: Python, Flask, Pandas, Scikit-learn, HTML, CSS, JavaScript, ReportLab, Joblib, LLM Integration (Ollama3)

AI-Assisted Blood Test Analysis System – Project Owner and Lead (TÜBİTAK 2209-A)

September 2025 – Present

- Analyzed Turkish laboratory reports and developed an AI prototype that provides users with clear and understandable explanations.
- Utilized Natural Language Processing (Zemberek, TurkishBERT) and machine learning (Random Forest, Decision Tree) techniques.
- Designed a dual-mode educational interface providing instructional content for medical students and simplified test interpretations for the general public.
- Achieved over 85% accuracy and high interpretability in the prototype developed with Python and Streamlit, aiming to improve health literacy.
- Application/Project No: 1919B012512296
- Project Advisor: Dr. Feyza Toktaş

Teknofest Projects

January 2026 – Present

- **Artificial Intelligence in Aviation Competition – Team Captain**
 - As team captain, actively manage team coordination, task distribution, and project planning.
 - Lead the development of AI-based systems, project architecture design, and model development processes.
- **Mining Technologies Competition – Team Member**
 - Team Role: AI Development, Data Analytics, and Documentation
 - Work on sensor-based data analysis and AI-supported early warning systems within the mining technologies project.
 - Actively develop machine learning models that analyze gas density change rates to detect risky situations in advance.
 - Manage data preprocessing, feature extraction, and model optimization processes to improve system accuracy and reliability.
 - Conduct technical documentation to ensure the project is sustainable and understandable.

Huawei Student Developers Ankara

- **Social Media Ambassador** February 2026 – Present
 - Management of all social media accounts
 - Content strategy and increasing community engagement
- **Secretary** September 2025 – February 2026
 - Documentation and communication processes
- **Organization and Prime Team Lead** March 2025 – November 2025
 - Event planning and team management

Additional Information

- English: **B2**
- German: **A2**
- ALES 06.07.2025: **92.8**
- YDS 16.11.2025: **73.75**
- YÖKDİL 08.03.2026: **90**

Trainings and Certifications

- **HCIA-AI V4.0 Course: Fundamentals and Applications of Artificial Intelligence | Huawei ICT Academy**
 - Certificate No: ICT20260402000525 | Date: April 2026
- **HCIA-Cloud Computing V5.5 Course: Cloud Computing Technologies and Virtualization | Huawei ICT Academy**
 - Certificate No: ICT20260402001018 | Date: April 2026
- **HCCDA-Tech Essentials Course: Cloud Developer and Core Technology Fundamentals | Huawei ICT Academy**
 - Certificate No: ICT20260402000008 | Date: April 2026
- **Complete Ethical Hacking Bootcamp | Udemy**
 - Duration: 28.5 Hours | Certificate No: UC-1aa9aba3-fd7e-4cca-89cc-a91ab86ee733 | Date: December 2025
- **Machine Learning | BTK Academy**
 - Approved by the Information and Communication Technologies Authority | Certificate No: qKrhe4vqB2 | Date: December 2025
- **Introduction to Deep Learning | BTK Academy**
 - Approved by the Information and Communication Technologies Authority | Certificate No: eK1h0aBleY | Date: December 2025
- **Natural Language Processing | BTK Academy**
 - Approved by the Information and Communication Technologies Authority | Certificate No: 9XrtzL8DMn | Date: December 2025
- **Network Fundamentals | BTK Academy**
 - Approved by the Information and Communication Technologies Authority | Certificate No: xr4tNZmBx0 | Date: December 2025
- **Algorithm 101 Training | Ankara University Computer Society**
 - Certificate No: DC-B2bzXE62 | Date: October 2023
